

**FAST FIRST AID SKILL SHEET #10**  
**BANDAGING A SUCKING CHEST WOUND**

*Bring tails around to starting point.*

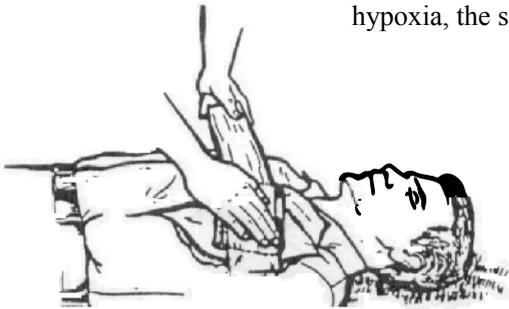

*Seal open chest wound with plastic wrapper.*

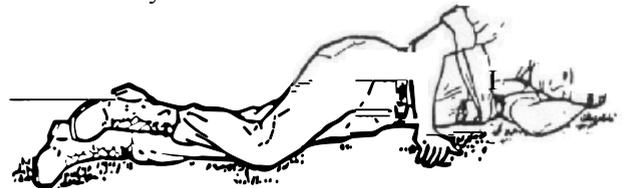

*Tie tails over center of dressing.*

If patient has increasing difficulty breathing with progressively shorter breaths, distended neck veins and hypoxia, the seal must be removed.

*Place field dressing directly over plastic wrapper.*

Consider taping the plastic down on just three sides to make a one way valve

*Casualty lying on injured side.*
